This article appeared in a newspaper in Hong Kong:

Man arrested for flying drone to take photos in Hong Kong International Airport

A 51-year-old man accused of flying a drone to take photographs in the restricted area of Hong Kong International Airport's departure terminal last week was arrested upon his return to the city on Monday.

The Hongkonger was picked up at the airport after flying in from Tokyo around midday, police said.

He was arrested on suspicion of breaking Airport Authority law on flight safety. The investigation showed the man was flying a drone to take photographs in the restricted area of the airport's departure hall at about 1.30pm last Thursday before he took a flight to leave Hong Kong.

Police were informed after his photos were posted on the internet. Detectives from the airport police district were then assigned to track him down.

After being identified, the man was placed on a list of persons wanted by police. He was stopped at the airport at noon, and police found the drone in his luggage.

The incident has prompted police to ask members of the public not to fly model planes or drones to take photos inside the airport.

A police source said the man had flown the drone near a boarding gate while waiting for a Tokyo-bound flight for a holiday.

He posted the photos taken by the drone on his Facebook page, and they were quickly picked up by internet users and spread online.

You are meeting members of your science group to discuss a project on drones. You may want to talk about:

- why drones are popular and useful
- what problems drones might cause
- what rules there should be about flying drones in Hong Kong
- anything else you think is important

PART B Individual Response

1. Would you like to have a drone?
2. Are drones popular in Hong Kong?
3. Where is a good place to fly a drone in Hong Kong?
4. Where would it be dangerous to fly a drone?
5. Why are drones good for taking photos?
6. How do you think drones will be used in the future?
7. How might drones be misused by some people?
8. How could the police use drones to reduce crime?
